Advances in Mathematics publishes papers in any area of pure mathematics. Particular regard is given to papers that represent a substantial advance in their field and that are stylistically attractive. It is recommended that papers be preceded by an introduction outlining the state of the subject and the relevance of the results presented.

is obtained from the probability density function of the up-time. Figure1 The General Bathtub Curve. (en.wikipedia.org /Bathtub curve) We can, in reverse, use the hazard rate as the starting point. In this case we have to consider the hazard rate  $h(t)$  of a type similar to that shown in figure 1. This is known as "A Bathtub curve". During the "Burn-
