Lab Report: Reaction Stoichiometry and the Formation of a Metal Ion Complex Objectives To use the method of continuous variation to determine the reaction stoichiometry for the formation of a metal ion complex between iron(II) cations and 1,10-phenanthroline.

Thanh Nguyen THE STOICHIOMETRY OF A REACTION Abstract: The objective of this lab is to determine the mole ratio of two substances, Potassium Chromate ( $K_2CrO_4$ ) to Lead Nitrate ( $Pb(NO_3)_2$ ). This was found by finding the mass of precipitate of the solution, and the number of millimoles of lead nitrate, which were then being put on a graph and with two best fit lines intersecting each other ...
