Lionel's ZW produced the most power of any postwar transformer. Even today, the ZW is sought after by Lionel enthusiasts as it is a reliable and dependable transformer. Features. Standard features of the ZW include: 250 watts for 1948 & 1949; then upgraded to 275 watts in 1950. Four controls to run four independent trains.

The Lionel Type Z Transformer was carried over from pre-war production and was available in from 1945 until 1947. Capable of producing 250 Watts on four independent circuits each producing 6-25 Volts, the TYPE Z was the largest of the pre-war transformers to be produced during the post-war period. This transformer did not have a built-in whistle or directional control and is used in ...

23/3/2016 · Even though this is a 1954 dated manual (275 Watt ZW), there would be no reason to differentiate the manual of a 250 vs 275 version transformer, as Lionel appears to have agreed that they are the same operationally, and even kept the 1948 artwork. Thank to each of you for the information.

12/4/2017 · Lionel transformer operation is simplified for children over 8 years of age to enjoy. The makers of Lionel trains recommend that an adult perform the wiring and track connection to install the transformer. Periodic parental inspection of the train, track, transformer, wires and connections is also advised for safety ...
