emission points and

Radiological & Nuclear pollution •Special form of physical pollution of air, water and soil with radioactive materials. •Radioactivity- Property of certain elements like Ra, Th, U etc to spontaneously emit alpha, beta & gamma rays by disintegration of atomic nuclei.

There are many solutions to air pollution. In order to improve air quality and slow climate warming, change needs to happen on a national and global scale. But actions at the individual and community level are also important. Burn less coal. Pollution from burning all fossil fuels is harmful to the atmosphere.

Air pollution can be defined as an alteration of air quality that can be characterized by measurements of chemical, biological or physical pollutants in the air. Therefore, air pollution means the undesirable presence of impurities or the abnormal rise in the proportion of some constituents of the atmosphere.
