[SSP #021] **Live Event Audio Engineering** As a live sound technician or engineer, you're responsible for installing and operating the sound and audio equipment for live concerts, speeches, plays, sporting games and other events. Your job includes managing the speakers, cables, mixing machines and other types of equipment used to capture and ...

Mixing Live Events. In spite of far-reaching advances in audio technology in recent years, many concerts still sound abysmal. However, while s/he is often viewed as the sole culprit - and will sometimes turn out to be the main culprit - a live sound-engineer may have to cope with a number of problems that are nowhere near the mixer.

undesired sound from instruments or other sound sources, and to provide sufficient gain-before-feedback. "Suitable" sound from the desired instrument may mean either the natural sound of the instrument or some particular sound quality which is appropriate for the application. "Undesired" sound may mean the direct or ambient sound from other
