digital signals and the engineering of devices that use or produce them. This is in contrast to analog electronics and analog signals.. Digital electronic circuits are usually made from large assemblies of logic gates, often packaged in integrated circuits. Complex devices may have simple electronic ...

An integrated circuit or monolithic integrated circuit (also referred to as an IC, a chip, or a microchip) is a set of electronic circuits on one small flat piece (or "chip") of semiconductor material, usually

This is an introductory course on data structures and algorithms
meant for students of electrical engineering, especially those
interested in computer aided design and design automation. The
course covers basic algorithmic complexity theory; data structures
and algorithms for list-like structures, graphs, matrices; Algorithm
