Forests as Complex Adaptive Systems: Building Resilience to the Challenge of Global Change (The Earthscan Forest Library) at Amazon.com. Read honest and unbiased product reviews from our users.

[Book] Managing Forests As Complex Adaptive Systems: Building Resilience to the Challenge of Global Change (The Earthscan Forest Library)

13/7/2020 · Resilience is a key concept to deal with an uncertain future in forestry. In recent years, it has received increasing attention from both research and practice. However, a common understanding of what resilience means in a forestry context and how to operationalise it is lacking. Here, we conducted a systematic review of the recent forest science literature on resilience in the forestry ...

Managing Forests as Complex Adaptive Systems: Building Resilience to the Challenge of Global Change. 2013. Routledge, The Earthscan Forest Library. 187. 213. Google Scholar. OpenURL Placeholder Text Bayerische ...

1/8/2006 · The resilience perspective shifts policies from those that aspire to control change in systems assumed to be stable, to managing the capacity of social–ecological systems to cope with, adapt to, and shape change (Berkes et al., 2003, Smit and Wandel, 2006). It is argued that managing for resilience enhances the likelihood of sustaining ...

Reading Managing Forests As Complex Adaptive Systems Building Resilience To The Challenge Of Global Change The Earthscan Forest Library

Managing Forests as Complex Adaptive Systems: Building Resilience to the Challenge of Global Change (The Earthscan Forest Library) by Christian Messier (Editor), Klaus J. Puettmann (Editor), K. David Coates (Editor) (15-Apr-2014) Paperback: Books - Amazon.ca

A Complex Business. In a complex adaptive system, local events and interactions among the “agents,” whether ants, trees, or people, can cascade and reshape the entire system—a property ...

Forest plantations of single tree species may have very different ecosystem characteristics than do many native forests, and create intensive and usually simplifying interactions with soils. These interactions may influence soil properties essential for sustained productivity, e.g. nutrient element biogeochemistry, organic matter dynamics, soil biota and dynamics of soil structure and porosity.

In Xu Z, Johnson C E, Chen C and T J Blumfield (eds.) Linking local management to global change challenges: the proceedings of
