the raw-water pumps can run constantly around the clock 3at $2,760/24 \text{ m/h} = 115 \text{ m/h}$. The effective volume of the clean-water tank and/or water tower and the maximum capacity of the treat-ment plant are crucial for investment costs in con-nection with groundwater wells. In the example, there is a clean-water tank of 1,600 m³.
