## **Intramuscular injection - Wikipedia**

*Intramuscular injection, often abbreviated IM, is the injection of a substance into a muscle. In medicine, it is one of several methods for parenteral administration of medications. Intramuscular injection may be preferred because muscles have larger and more numerous blood vessels than subcutaneous tissue, leading to faster absorption than subcutaneous or intradermal injections.*

## **Dente decíduo – Wikipédia, a enciclopédia livre**

*O dente decíduo é o dente que surge durante a ontogenia de humanos e outros mamíferos. [1] O desenvolvimento dentário começa durante o período embrionário e os dentes tornam-se visíveis (erupção dentária) na boca durante a infância. Esses dentes são popularmente conhecidos como dentes de leite, cuja denominação surgiu devido a sua coloração ser mais branca, opaca e leitosa.*
