Evolution is the process of change in all forms of life over generations, and evolutionary biology is the study of how evolution occurs. Biological populations evolve through genetic changes that correspond to changes in the organisms' observable traits. Genetic changes include mutations, which are caused by damage or replication errors in organisms' DNA.

The environmental impact of agriculture is the effect that different farming practices have on the ecosystems around them, and how those effects can be traced back to those practices. The environmental impact

of agriculture varies widely based on practices employed by farmers and by the scale of practice. Farming communities that try to reduce environmental impacts through modifying ...

1/8/2019 · Like the rest of the third world country, Bangladesh (), one of the most densely populated countries, is facing severe water pollution and scarcity. Although 97% of the total population has access to water, the quality of water is always questionable (). Bangladesh is a riparian country, consisting of more than 230 large and small rivers (Figs. 2 and 3).

Peternakan adalah kegiatan
