Mobile Provider Network: The mobile provider network is the provider of wireless communications that owns or controls all of the elements necessary to sell and deliver services to an end user including radio spectrum allocation, wireless network infrastructure, back haul

8/12/2011 · Despite increasing usage of mobile computing, exploiting its full potential is difficult due to problems such as resource sparseness. In this paper, we explore the feasibility of a mobile cloud computing framework to use local resources to solve these problems. The framework aims to determine a priori the usefulness of sharing workload at runtime. The results of experiments conducted in ...
