1.1 Modbus RTU Implementation This implementation is designed to provide a popular data exchange
format connecting these instruments to both Honeywell and foreign master devices. The Modbus RTU
allows the instrument to be a citizen on a data link shared with other devices that subscribe to the Modbus
RTU RS-485 specification.

to the destination device, making the Modbus address field imbedded in the message unnecessary for the
actual transmission.(The Modbus address is converted to a network node address and routing path by the
or originating controller or its network adapter.) RTU Framing In RTU mode, messages start with a silent
