Twitpic

Dear Twitpic Community - thank you for all the wonderful photos you have taken over the years. We have now placed Twitpic in an archived state.

Computer program - Wikipedia

A computer program is a collection of instructions that can be executed by a computer to perform a specific task.. A computer program is usually written by a computer programmer in a programming language.From the program in its human-readable form of source code, a compiler or assembler can derive machine code—a form consisting of instructions that the computer can directly execute.

Kernel (operating system) - Wikipedia

The kernel is a computer program at the core of a computer's operating system that has complete control over everything in the system. It is the "portion of the operating system code that is always resident in memory", and facilitates interactions between hardware and software components. On most systems, the kernel is one of the first programs loaded on startup (after the bootloader).
