this lab, we will look at the skulls of various mammals. Procedure In this lab, groups at the same table will work together. Part I: Human Evolution Shown below is a very rough outline of human evolution. While the general form is agreed on by most scientists, many of the details (exact dates & branching patterns) are still subjects of debate.

Mammals, members of the class Mammalia of vertebrate animals that includes humans, are the most highly advanced organisms on Earth. They are warm-blooded, hairy, have four-chambered hearts, relatively large brains, and they suckle their young. There are 19 orders of mammals in the world. Ten of these live in North America.
