to-dawn sensor detects light in the morning. Once the dusk-to-dawn sensor detects light, the manual "ON" mode will automatically go back to its original settings of the AUTO motion sensor mode. At any point while in manual "ON" mode, return to the AUTO motion sensor mode by toggling the wall light switch OFF and ON again within 2 seconds.

It is motion-activated and light-sensitive light that illuminates at darkness when someone get close to its sensing range(5m, 120 degrees) and lasts about 35s after he stepping away. One button press, you can choose from 7 different single colors or 12 colors Carousel mode. Features Universal fit: Transform any toilet into a night light.

The security light will stay on as long as motion is detected and will go off after the time span you set after motion is detected.

**CAUTION: DO NOT OVERTURN.** 3 Manual Override Function  
When power is on, the PIR sensor enters a "warm-up" period for about 1 minute, ...

on the link below. Click here for the North American version of the manual.

Light comes on half bright for selected time after dusk (Off, 3 hr., 6 hr., until dawn). Selecting OFF disables this feature. The motion sensing features will continue to work as described in this manual. If motion is sensed, the light turns on full bright for the ON-TIME (1, 5, or 20 minutes) then returns to dim mode. Move ON-TIME Switch to

11/8/2015 · The FIBARO Motion Sensor is a battery powered device, designed to be installed quickly and easily on any surface. The LED indicator signals motion, temperature level, operating mode and can be used to see if the device is within the range of Z-Wave network. The motion sensor can be used for lighting scenes and security monitoring systems.

tional sensors. The PIR motion sensors from Panasonic offer crucial advantages over conventional PIR motion sensors. The unique design concept (explained below) ranges from the production of the pyroelectric sensing devices to the internal signal processing, thus guaranteeing an optimal detection capability and high reliability. Easy design-in

of the sensor in the TEST position. Manual mode only works at night because daylight returns the sensor to AUTO. Flip the light switch off for one second then back on to toggle between AUTO and MANUAL MODE. Manual mode works only with the ON-TIME switch in the 1, 5, or 10 position. Move ON-TIME Switch to
