In medicine, triage (/ ? t r i ? ?? ?, t r i ? ?? ? /) is a practice invoked when acute care cannot be provided for lack of resources. The process rations care towards those who are most in need of immediate care, and who benefit most from it. More generally it refers to prioritisation of medical care as a whole. In its acute form it is most often required on the battlefield, or at ...

NEW Wording to TCCC Guidelines: Tactical Field Care & Tactical Evacuation Care. 7. Hypothermia Prevention. a. Take early and aggressive steps to prevent additional body heat loss and add external heat when possible for trauma and severely burned casualties. b. Minimize casualty's exposure to cold ground, wind, and air temperatures.

4/4/2014 · Red blood cell transfusion is an important and frequent component of neonatal intensive care. The present position statement addresses the methods and indications for red blood cell transfusion of the newborn, based on a review of the current literature. The most frequent indications for blood transfusion in the newborn are the acute treatment of perinatal hemorrhagic shock and the recurrent ...
