The Nikon EM is a beginner's level, interchangeable lens, 35 mm film, single lens reflex (SLR) camera.It was manufactured by Nippon Kogaku K. K. (today Nikon Corporation) in Japan from 1979 to 1982 (available new from dealer stock until circa 1984). The camera was designed for and marketed to the growing market of new photographers then entering the SLR buyer's market.

The F80 was the first Nikon camera to feature on-demand grid lines. The F80 was chosen by Nikon to be the basis for the popular Nikon D100 digital SLR. The chassis was also used by Fujifilm as the basis for the FinePix S2 Pro and S3 Pro, and by Eastman Kodak for the Kodak DCS Pro 14n and DCS Pro SLR/n.
