Data analysis is a process of inspecting, cleansing, transforming, and modelling data with the goal of  
discovering useful information, informing conclusions, and supporting decision-making. Data analysis  
has multiple facets and approaches, encompassing diverse techniques under a variety of names, and is  
used in different business, science, and social science domains.

Its slices are upturned into an inviting smile. Its simple charm is beloved by all but a few, welcomed  
almost everywhere; familiar and rarely threatening. Of all the graphs that play major roles in the lexicon  
of quantitative communication, however, the pie chart is by far the least effective. Its colorful voice is  
often heard, but rarely ...
