work followed a series of previous holographic investigations of the bulk thermodynamic properties of dense and cold quark [42{47] and nuclear matter [48{51], but was the rst one to study transport in the high-baryon-density regime (for the high-temperature, zero-density context, see, e.g., [52{

physics. We also need to keep in view the role of physics as a training ground for the mind. Not all students who complete B.Sc. (Hons.) in Physics will go on to become professional physicists. Nevertheless, the study of physics is likely to make them good at logical thinking, quantitative argumentation, etc.

What are the best-practices for using Active Directory to authenticate users on linux (Debian) boxes? The way I would like it to work would be to add AD users to a group - say linux administrators or linux webserver, and based on their group membership they would/would not be granted access to a particular server. Ideally the root account would be the only one maintained in the standard way.
