The decision to take unit 1 of the Taishan nuclear power plant in China's Guangdong province offline to investigate a fuel failure issue lies with the plant operator, EDF said yesterday. However, it said under its own operating procedures for its French units, operation of the EPR would be temporarily halted to carry out such inspections and take corrective measures.

Nuclear power. Nuclear power is an abundant source of carbon-free energy and is available 24/7. However, it has a number of disadvantages that make it an unlikely source of carbon-free energy in the United States and most other countries. Some countries such as China, Russia, and South Korea are expanding their nuclear power capacity.

This special issue is for the scientific and industrial community to present their novel methodologies, techniques, and solutions which can address theoretical and practical issues. It is worth mentioning that the submissions are the selected papers with high quality which have been reported at the CCF 13th International Conference on Service Science (ICSS 2020).
