31/12/2019 · Kill bed bugs in smaller items by placing them in a freezer. Although bed bugs can't withstand freezing temperatures, they can live for up to a year in a cool room without any food sources. To naturally kill the bedbugs you need to place infested items in a freezer that has a temperature below 1°F (-17°C) for at least 2 hours. 5

2/6/2020 · Cayenne Pepper. When mixed with other natural items like ginger and oregano, cayenne pepper works to kill a bed bug on contact. Here's how to make this natural solution: Mix one teaspoon each of cayenne pepper, ground ginger, and oregano oil. Strain the ingredients and add to a spray bottle filled with water. Spray to your heart's content.

25/3/2021 · According to the Department of Entomology at the University of Kentucky, bed bugs are more active at night when they come out to feed. They feed on the blood of humans and pets, however, in cooler temperatures, can go up to 6 months without feeding. 2 The best places to use bed bug sprays are in the tiny crevices around bed frames, in seams of mattresses, box springs, and headboards where bed ...
