operation. This will dissipate after the break-in period. If you are sensitive to odors, you may want to pre-burn the unit ...

The stove must be placed on hearth that is non-combustible, having a thickness of 3/8" or greater. A 36"x 36" hearth pad area is recommended. Once a location is established, the stove can be placed on the hearth and leveled. It is absolutely imperative that your Arctic is level. Leveling bolts are provided in your owners manual.

- Always leave this manual with the owner of the stove.
- A carbon monoxide (CO) detector has been supplied with your stove. o. The CO Detector needs to be plugged in. o CO is colorless, odorless & tasteless gas that can be deadly if not monitored or detected properly.

22/9/2009 · Hello from Alaska, I've got a cabin that had an Earth Stove already in it. The stove works great, but the previous owner had painted it and painted over the model # and all the placecards. There's a damper on the bottom right hand side of the stove and is either pointed down or can be rotated 90 degree's so it is pointing toward you.
