20/7/2021 · The Oxford Handbook of Anxiety and Related Disorders reviews current research and clinical developments through synthetic

chapters written by experts from various fields of study and clinical backgrounds. The book discusses each of the main anxiety disorders, examining diagnostic criteria, prevalence rates, comorbidity, as well as clinical issues.

7/12/2019 · It starts with a grounding in the basic mechanisms of fear and anxiety moving onto transdiagnostic processes (meaning negative affectivity, anxiety sensitivity, intolerance of uncertainty and tolerance of stress) before covering assessment, diagnosis and manifestations of anxiety and related disorders, features of specific disorders such as panic disorder, agoraphobia, generalized anxiety ...

This chapter provides a review of the research literature on psychological treatment for panic disorder and agoraphobia (PDA). The most extensively studied psychological treatment for PDA is cognitive behavioral therapy (CBT). This chapter summarizes specific CBT strategies and treatment packages, findings from efficacy and effectiveness studies, prevention initiatives, predictors of ...

(p. 162) Before discussing the anxiety disorders, it is important to consider the concept of anxiety and its heterogeneity. Anxiety refers to multiple mental and physiological phenomena, including a person's conscious state of worry over a future unwanted event, or fear of an actual situation. Anxiety and fear are closely related.

the fate of positive psychology. Although science certainly advances on the merits of particular ideas and facts, it also is true that the success of a new theory rests, in part, upon its ability to gather supporters. On this point, this handbook may enable you to cast a more informed vote as to the enduring viability of positive psychology.

Cognitive control is the ability to direct attention and cognitive resources toward achieving one's goals. However, research indicates that anxiety biases multiple cognitive processes, including cognitive control. This occurs in part because anxiety leads to excessive processing of threatening stimuli at the expense of ongoing activities.
