## Read Pascals Law Sample Problem And Solution

*Thus, the bulk modulus of the water is about 2.2 billion pascals. Practice Problem: A certain sound wave in air can be described by the expression  $400 \sin(6,300t - 18.3x)$  pascals, where  $t$  is measured in seconds and  $x$  in meters. What is the speed of sound in air? Solution: The general expression we used for sound waves is  $?p \sin(?t - kx)$ , where*
