product recommendations affects consumer responses in different stages of buying. In addition, the purpose is to measure perceived intrusiveness of personalized product recommendations. The study is conducted by using data from five different online stores and ten different personalized product recommendation advertisements.

Personalized Dynamic Content Whitepaper Personalized Dynamic Content An easy way to provide the end user with filters to “self-select” the content most relevant to their role, location, product or other criteria Introduction: A new solution to an old problem.

Targeting personalized product recommendations to individual customers has become a mainstream activity in online stores as it has been shown to increase click-through rate and sales. However, as personalization becomes increasingly commonplace, customers may feel personalized content intrusive and therefore not responding or even avoiding them. Many studies have investigated advertising ...
