The pH scale ranges between 0 and 14. Neutral pH is represented by 7, which

Download Ph Scale Worksheet Answers ebooks

would be that of distilled water. Those pH levels above 7 and up to 14 are the readings that would be obtained from those substances termed bases. A pH reading of 14 represents the highest degree of alkalinity, a term used to describe the relative strength of a base.

The pH scale is used to classify substances as acids and bases. The scale goes from 0 to 14. Things that are acids have a pH number that is less than 7. The lower the number, the stronger the acid. Bases have pH values higher than 7. The higher the number, the stronger the base.
