putting out full pressure the carb is leaning out.

Take a straw and put it in a glass of water and hold your finger over the end and lift the straw out of the water. The water will stay in the straw until you remove your finger from the end and allow the air to vent. The same thing happens with gas tanks. Try it and let me know.

24/4/2014 · My machine has a Honda GX390 13-HP motor with a General 4040 direct drive pump. The pump and unloader probably have less than 100 hours on them. I am guessing the motor has around 500 +/- . The motor has always ran great until the end of last year. It seems to hunt or surge when I release the trigger after spraying.
