creating the project strategy by feeding it from the parent organization [8,13–15]. This literature track assumes that the strategy is created in the front end phase of the project, and that the project strategy is a static plan-like representation, explicitly documented in project documents. Such project strategies (as

6/6/2019 · Without effective strategic planning, it's difficult to achieve success in project management. 1 Strategic planning focuses on a business's future by understanding operational priorities and resource availability, setting out clear objectives for desired business results, and developing an action plan on how to achieve them. 2 The process creates and implements decisions that

priorities and direction. The implementation links strategic planning with operational planning and financial planning and management. Adopting a structured approach to procurement planning results in robust, objective analysis that informs the best methodology to approach the market and achieve optimal procurement outcomes.

(A). Most deductive approaches of scenario planning are based on future-open thinking and strategic thinking—but they ignore the complexity in the future sphere (B). Other, more technocratic approaches—mostly from Continental Europe—create very complex scenarios but often fail with the integration into strategic management (C). Scenario
