directions.

3/2/2021 · 1. Introduction. Colorectal cancer (CRC) is one of the most common human malignancies in the Western countries, being the world's fourth most deadly malignancy []. An unhealthy diet and lifestyle, common in well-developed countries, are implicated as risk factors for CRC [2,3,4,5,6,7]. Chronic inflammation is also recognized as a potential risk factor for tumor development.

Chemoprevention is the long-term use of different chemical agents, both synthetic and natural, to prevent or delay the onset of disease. Since colorectal cancer has a significant environmental component, it is an ideal disease in which to evaluate the potential benefits of chemopreventive agents. The polyamines, spermine, spermidine
