Azure Red Hat OpenShift documentation. Azure Red Hat OpenShift provides single-tenant, high-availability Kubernetes clusters on Azure, supported by Red Hat and Microsoft.

Red Hat Enterprise Linux 5 Documentation. Release Notes Version Published; x86 architecture: 5.1.0 Beta: Jul 18, 2007: x86_64 architecture

Software in Red Hat Enterprise Linux is a limited subset of Fedora and has about 4000 binary packages (RHEL 6). These are the ones enterprise customers demand and are supported by Red Hat. Fedora offers a wide range of software packages and the latest release has well over 25000 unique (not counting updates in Fedora 15) binary software packages available in the repository.

Red Hat on GitHub. Commit to collaborate. Push innovation. Collaborating with a community is about more than developing code. Collaboration is the freedom to ask questions and offer improvements—that's the open source way. It's why we've been a part of open source communities for more than 25 years, working side-by-side with people like you.

Satellite 6 is an add-on for Red Hat Enterprise Linux. Admins can choose whether to use RHEL 6 or RHEL 7. If you are installing a new Satellite server, you will probably go for RHEL 7, because it offers newer software and is supported for a longer period of time. If the server is running on RHEL 7, you can still use RHEL 6 clients with the server.
