Women, Feminism and Biology: The Feminist Challenge. Wheatsheaf, 1986. EDITED BOOKS. Reinventing Biology: Respect for Life and the Creation of Knowledge. Co-authored with Ruth Hubbard. Indiana University Press, 1995. More than the Parts: Biology and Politics. Co-authored with Jonathan Silvertown. London: Pluto, 1984.

SEX/GENDER. Although the terms sex and gender are often used interchangeably, they, in fact, have distinct meanings. Sex is a classification based on biological differences—for example, differences between males and females rooted in their anatomy or physiology. By contrast, gender is a classification based on the social construction (and maintenance) of cultural distinctions between males ...

We may use scientific knowledge to help us make the decision, but only our beliefs about gender – not science – can define our sex. Furthermore, our beliefs about gender affect what kinds of knowledge scientists produce about sex in the first place. (p. 3) Biology offers up dichotomous male and female prototypes, but it also offers us many

Historical Foundations of Race. The term “race,” used infrequently before the 1500s, was used to identify groups of people with a kinship or group connection. The modern-day use of the term “race” is a human invention. The world got along without race for the overwhelming majority of its history. The U.S. has never been without it.

27/10/2015 · Socioeconomic, racial/ethnic, and gender inequalities in academic achievement have been widely reported in the US, but how these three axes of inequality intersect to determine academic and non-academic outcomes among school-aged children is not well understood. Using data from the US Early Childhood Longitudinal Study—Kindergarten (ECLS-K; N = 10,115), we apply an intersectionality ...

In an equitable classroom environment, students of all backgrounds (e.g., race, nationality, gender) have the same opportunities to learn and develop their knowledge. To create an equitable learning environment, educators must be culturally competent and possess the ability to communicate and work effectively across cultural lines.

4/3/2015 · Race and ethnicity are two of the strongest yet least understood and underexplored correlates of offending. This essay highlights the need for theoretical and empirical research on longitudinal patterns of offending across race and ethnicity so as to expand the traditional focus of developmental and life course criminology. It also uses data from a sample of serious youthful offenders ...

The way they are treated socially in combination with their biological sex will determine the child’s gender. The approach assumes that gender

identity is neutral before the age of 3, and can be changed, e.g. a biological boy raised as a girl will develop the gender identity of a girl. This is known as the theory of neutrality. Empirical Evidence

5/5/2017 · More than 70 years ago, Aldo Leopold (2013 [1938]) decried the loss of field studies in biology education. The subsequent decades have only amplified this decline. For example, within the past 20 years, both Schmidly and Hafner described the significant loss of field-based opportunities in mammalogy, and Wilcove and Eisner described the “impending extinction of natural history.”

UNESCO Statements on Race. The establishment of the United Nations (UN) following World War II led to a surge in declarations, conventions, and organizations aimed at promoting human rights and equality. The legacy of Nazism and the failure of the League of Nations galvanized the UN to formulate two critical postwar documents: the Universal Declaration of Human Rights (1948), and the Genocide ...

25/10/2016 · Gender identity haunts every aspect of our lives, dictating the outcomes of our conversations, our workplaces, our relationships – even our bath products. Before most infants are named, they are assigned a sex based on the appearance of their external genitalia by a third party. These decisions are dolled out in a typically binary fashion, with no expectations for ambiguity.
