Reproductive System Structure and Function You learned that the reproductive cells in males are called sperm. In females, they are called eggs, or (singular,ovum). The functions of the female reproductive system are to produce sex hormones, to produce eggs, and to provide a nourishing environment in which a fertilized egg can develop into a baby.

Biology 12 - The Reproductive System! • Part A: Definitions: Please define or explain the following terms, in your OWN WORDS, in as few words as clarity allows. a) testes male gonads which produce sperm and testosterone b) scrotum sac in which testes are suspended, hang underneath penis outside male's body
