The ASPAN Standards define “critical elements” as “report has been received from the anesthesia care provider, questions answered, and the transfer of care has taken place; patient has a stable/secure airway; initial assessment is complete; patient is hemodynamically stable, and patient is free from agitation, restlessness, combative behaviors”(2) The Standards further define an ...

Ketamine is a medication primarily used for starting and maintaining anesthesia. It induces dissociative anesthesia, a trance-like state providing pain relief, sedation, and amnesia. The distinguishing features of ketamine anesthesia are preserved breathing and airway reflexes, stimulated heart function with increased blood pressure, and moderate bronchodilation.
