However some generalisations have been drawn through social science. In a classic review article published in Science in 1987, Paul Slovic listed various social and cultural factors that lead to inconsistent evaluations of risk in the general public. He emphasizes the essential way in which experts and laypeople's views of risk differ.

In contrast, Waldman et al., explore the role of the social, economic, and cultural context in shaping the perceptions and practices of actors who play significant roles in risk management. This paper illustrates the importance of understanding "situated expertise" and particular forms of risk perception and practice which both enhance and compromise risk reduction in different ways ...
