Roll Forming, Custom Roll Forming and Value-Added Manufacturing OMCO

manufactures highly engineered, custom roll formed shapes for many applications across a wide range of industries. Custom built components for truck bodies, trailer frames, material handling, solar panel frames and supports, conveyors, escalators, and many more industries are manufactured cost effectively using roll

**MATERIAL DEFORMATION DURING SHEET METAL FORMING** Deformation analysis Principal strain plane The analysis of deformation in sheet metal forming is often based on the two principal membrane strains  $\epsilon_1$  and  $\epsilon_2$ . Most often, the maximum principal strain  $\epsilon_1$  is positive in a forming operation.
