In the Examples section, the idea of nested models is illustrated in the Tobacco Control family of models. It includes a global model that encompasses three intermediate outcomes in tobacco control - environments without tobacco smoke, reduced smoking initiation among youth, and ...

25/1/1997 · 1. Philosophical and Historical Motivation. Game theory in the form known to economists, social scientists, and biologists, was given its first general mathematical formulation by John von Neuman and Oskar Morgenstern (). For reasons to be discussed later, limitations in their formal framework initially made the theory applicable only under special and limited conditions.
