SECUREDATA, Inc. is a privately held company, headquartered in California, USA. SecureData offers a range of tailored high-level data protection capabilities through a set of services and products. These include hardware encrypted portable data storage devices, backup solutions, file repair software, data recovery, and digital forensics services to help clients achieve their security objectives.

Get More Out of Your Data. PDF Solutions provides additional offerings to help customers achieve specific outcomes. These solutions include the use of Machine Learning (e.g. predicting Early Life Failures), Characterization Vehicles® to accelerate yield learning for advanced process nodes and derivative legacy nodes, and next-generation Design For Inspection™ solutions that identify ...

What is PDF file security? While PDF encryption is used to secure PDF documents so they can be securely sent to others, you may need to enforce other controls over the use of your documents to prevent authorized users using documents inappropriately. For example, you may want to stop users copying text or printing PDFs. So PDF file security is delivered by of a combination of different ...

Most solutions also include security key management capabilities. Data Erasure. More secure than standard data wiping, data erasure uses software to

completely overwrite data on any storage device. It verifies that the data is unrecoverable. Data Masking

SSIF Solutions Guide for Data-At-Rest 5- Introduction The SNIA Storage Security Industry Forum (SSIF) of the Storage Networking Industry Association (SNIA) has produced the SSIF Solutions Guide for Data-At-Rest to address some of the concerns that have arisen with the recent focus on data privacy, integrity, availability, and liability.
