Keep these items in this Septic System Owner's Guide file folder. The location of the septic tank and drainfield can usually be determined with a copy of the permit and with the help of a septic contractor, consultant, or the local health department. Most housing sites permitted since the

Septic systems have a false reputation that they ruin the landscape of the property. In reality, they are flexible with landscape changes, as long as the landscaper follows a few tips: • Do not build houses, sheds, patios, or other structures on top of your septic system. This can damage the components and cause the septic system to fail.
