A mucous membrane or mucosa is a membrane that lines various cavities in the body and covers the surface of internal organs. It consists of one or more layers of epithelial cells overlying a layer of loose connective tissue. It is mostly of endodermal origin and is continuous with the skin at body openings such as the eyes, ears, inside the nose, inside the mouth, lip, vagina, the urethral ...

epithelia of body, e.g., forms lamina propria of mucous membranes; packages organs; surrounds capillaries. Photomicrograph: Areolar connective tissue, a soft packaging tissue of the body (300x). Epithelium Lamina propria Fibroblast nuclei Elastic fibers Collagen fibers

Accidental exposure to blood or other body fluids Exposure to bloodborne pathogens may occur in case of: – contact with blood or body fluids with a non-intact skin or with mucous membranes; – percutaneous injury with needles or sharp instruments contaminated with blood or body fluids.

Geotrichum—a yeast like fungus that causes infections of the bronchi, lungs, and mucous membranes; and. Candida—a yeast like fungus that is part of the normal mucous flora but can get out of control, leading to lesions in mouth (thrush), vagina, skin, hands, and lungs.

4. Inspect and describe skin lesions. 5. Observe and palpate skin moisture. 6. Palpate skin temperature. Compare the two feet and the two hands, using the backs of your fingers. Backs of fingers pick up temperature differences more readily. 7. Note skin turgor (fullness or elasticity) by lifting and pulling the skin on an extremity into a ...

in our body are favourable for diffusion of O₂ from alveoli to tissues and that of CO₂ from tissues to alveoli. Figure 17.4A Diagram of a section of an alveolus with a pulmonary capillary. Figure 17.3 Diagrammatic representation of exchange of gases at the alveolus and the body tissues with blood and transport of oxygen and carbon dioxide 2021-22

Skin cancer, or neoplasia, is the most common type of cancer diagnosed in horses, accounting for 45 to 80% of all cancers diagnosed. Sarcoids are the most common type of skin neoplasm and are the most common type of cancer overall in horses. Squamous-cell carcinoma is the second-most prevalent skin cancer, followed by melanoma. Squamous-cell carcinoma and melanoma usually occur in horses ...

‘cosmetic product’ means any substance or mixture intended to be placed in contact with the external parts of the human body (epidermis, hair system, nails, lips and external genital organs) or with the teeth and the mucous membranes of the oral cavity with a view exclusively or mainly to cleaning them, perfuming them, changing their appearance, protecting them, keeping them in good ...
