Local anaesthetic techniques: Epidural or incisional and intraperitoneal/ovarium ligament block with
lidocaine. Postoperative analgesia: NSAID. Analgesia may be supplemented after most surgical
techniques by application of non-drug modalities such as cold therapy, laser therapy, acupuncture,
nursing care, mild exercise and massage.

bilateral mastectomy [1-3,7]. Surgical techniques based on lymphatic drainage alone are now regarded
as an oversimplification since anatomic variability in lymphatic drainage was reported in both normal
and neoplastic mammary tumors [8-10]. Lumpectomy or nodulectomy. implies removal of benign,
small

Local anaesthetic techniques: Epidural local anaesthetic (lidocaine) can be used as a sole technique
but with caution. NOTE: due to the decreased size of the epidural space in pregnant animals smaller
volumes (25–30% reduction) of epidural local anaesthetic drugs are used.
