HTML PDF: System Administration Guide Part No. 215-08532\_C0: Describes general system administration of 7-Mode systems, including the CLI interface, system access, system management, user account management, event monitoring, and performance evaluation.

The cluster management server, also called an adminSVM, is a specialized storage virtual machine (SVM) implementation that presents the cluster as a single manageable entity. In addition to serving as the highest-level administrative domain, the cluster management server owns resources that do not logically belong with a data SVM.

Solaris Volume Manager Administration Guide September 2013. The Solaris Volume Manager Administration Guide provides instructions on using Solaris Volume Manager to manage disk storage, including creating, modifying, and using RAID-0 (concatenation and stripe) volumes, RAID-1 (mirror) volumes, RAID-5 volumes, and soft partitions.

Product Description. SolarWinds Virtualization Manager offers an easy-to-use, scalable virtualization management solution whose resources can also be integrated with other SolarWinds products on the Orion platform. SolarWinds Virtualization Manager provides visibility into virtual machines and their support infrastructure.

The cluster management server, also called an adminSVM, is a specialized storage virtual machine (SVM) implementation that presents the cluster as a single manageable entity. In addition to serving as the highest-level administrative domain, the cluster management server owns resources that do not

logically belong with a data SVM.
