Automotive engineering allows those who are passionate about driving the opportunity to work in the automotive industry designing, building and testing next generation automobiles that you, your family and friends will be driving in ...

Deconstruction - Wikipedia

Deconstruction is an approach to understanding the relationship between text and meaning. It was originated by the philosopher Jacques Derrida (1930–2004), who defined the term variously throughout his career. In its simplest form it can be regarded as a criticism of Platonism and the idea of true forms, or essences, which

take precedence over appearances.

Engineering Days - Walter Scott, Jr. College of Engineering

Department of Mechanical Engineering: Don Radford: Composite Materials, Manufacture and Structures (CMMS) Lab The Advanced Extruder Head project advances the development of 3D printing composite materials. There is a need in the composites industry to improve continuous fiber placement for continuous fiber thermoplastic matrix composites.

Intel - Wikipedia

Intel was founded in Mountain View, California, in 1968 by Gordon E. Moore (known for "Moore's law"), a chemist, and Robert Noyce, a physicist and co-inventor of the integrated circuit. Arthur Rock (investor and venture capitalist) helped them find investors, while Max Palevsky was on the board from an early stage. Moore and Noyce had left Fairchild Semiconductor to found Intel.
