The likely range of the human contribution to the global mean temperature increase over the period 1951–2010 is 1.1° to 1.4°F (0.6° to 0.8°C), and the central estimate of the observed warming of 1.2°F (0.65°C) lies within this range (high confidence). This translates to a likely human contribution of 93%–123% of the observed 1951–2010 change.

21/11/2016 · In the November 9, 2017 Southern California Daily Energy Report commentary, EIA reported how warmer-than-normal weather this fall has contributed to natural gas spot price volatility. Natural gas consumption (sendout) on the SoCalGas system was much lower than in prior years during the period between September 1 and December 4, 2017 (upper left chart).

Harry Truman was the first U.S. president to receive a daily intelligence digest. At his direction, the Daily Summary began production in February 1946, and continued until February 1951. President Truman was pleased with the product, but a survey group commissioned by the National Security Council in 1949 was critical of the Daily Summary and issued several recommendations to improve it.

NOAA Weather Radio (NWR; also known as NOAA Weather Radio All Hazards) is an automated 24-hour network of VHF FM weather radio stations in the United States (U.S.) that broadcast weather information directly from a nearby National Weather Service office. The routine programming cycle includes local or regional weather forecasts, synopsis, climate summaries or zone/lake/coastal waters forecasts ...

Foreword by António Guterres, Secretary-General of the United Nations. 2020 was an unprecedented year for people and planet: a global pandemic on a scale not seen for more than a century; global temperatures higher than in a millennium; and the highest concentration of carbon dioxide in our atmosphere for over 3 million years.

10/6/2021 · The March 31 st Prospective Plantings report from the USDA continues to reverberate through the grain markets. The report indicated that both corn and soybean planted acreage was much smaller than expected (farmdoc daily, April 7, 2021).). This has prompted considerable discussion about the possibility of USDA corn and soybean planted acreage estimates increasing in future reports, especially ...
