of Spring. As per my experience good interviewers hardly plan to ask any particular question during your interview, normally questions start with some basic concept of the subject and later they continue based on further discussion and what you answer: What is Spring? Spring is an open source development framework for enterprise Java.

Spring supports Aspect-oriented programming. Aspect-oriented programming refers to the programming paradigm which isolates secondary or supporting functions from the main program's business logic. AOP is a promising technology for separating cross-cutting concerns, something usually hard to do in object-oriented programming.
