SCIENCE AND TECHNOLOGY IN MODERN SOCIETY 9 CHAPTER 2 SCIENCE AND TECHNOLOGY IN MODERN SOCIETY About 200 years ago the pace of technological change in western society began to quicken. Wind, water, and animal power, with their limitations of place and capacity, were supplemented and then replaced by the steam engine, which went on to power the factories of the industrial revolution.

(the emergence of modern 'Westphalian' notions of sovereignty), 1919 and 1945 (the two World Wars and start of the Cold War as major contestations over world power), and 1989 (the end of the

Cold War and bipolarity) – omit the principal dynamics that established the modern international order (Buzan and Lawson 2013). These

for the United States.”¹ This paper will demonstrate that not only is nation-building a mission that the United States has thought about but that it is a mission that the United States has repeatedly engaged in since 1898. Nation-building is a term used world-wide by politicians, international organizations, and in

Economic frustration and unequal opportunities are fertile breeding grounds for dissent and protest. Equally important is the failure of most Muslim governments to confront the demands of general education. "Modernity, the circumstance of being 'modern', is, in a central sense, inescapable.

State formation is the process of the development of a centralized government structure in a situation where one did not exist prior to its development. State formation has been a study of many disciplines of the social sciences for a number of years, so much so that Jonathan Haas writes that "One of the favorite pastimes of social scientists over the course of the past century has been to ...
