Structure and functioning of tributary watershed ecosystems in the Eastern Rivers and Mountains Network: Conceptual models and vital signs monitoring. Natural Resources Report NPS/NER/NRR-2006/009. National Park Service, Philadelphia, PA. 88pp.

The inclusion of "related terrestrial ecosystems" for this study is a reflection of the state of the science that recognizes the multitude of processes linking terrestrial and aquatic systems. River ecologists have long understood the important connections between rivers and their floodplains (Junk et al., 1989; Stanford et al., 1996).
