Sunpak Heaters are available with two different input rates. The Model S25, rated at 25,000 Btu/Hr, allows people to be comfortable at lower mounting heights. The model S34, rated 34,000 Btu/Hr, requires greater clearance from combustible material, and it is comfortable at greater mounting heights (see page 4).

Sunpak® installations should be reviewed to determine the effectiveness for regional environments. The environments in which Sunpak® heaters are utilized vary greatly. As an outdoor rated heater it has passed basic wind and rain tests. This does not mean the heater cannot be damaged by the environment or when operated in very windy conditions.

Well, someone can announce by themselves what they want to get **Sunpak S34 Tsr Pdf** and craving to complete but sometimes, that nice of person will infatuation some PDF references. People following right to use minded will always try to want for the other things and counsel from many sources. on the contrary, people in the same way as closed mind will always think that they can reach it by their principals. So, what nice of person are you
