It concentrates on the engineering of human-made systems and on systems analysis. In the first case, emphasis is on the process of bringing systems into being, beginning with the identification of a need and extending through requirements determination, functional analysis and allocation, design synthesis and evaluation, validation, operation and support, and disposal.

Systems Engineering and Analysis, 5th Edition. A focus on the end goal—designing, delivering, and sustaining functionality, a capability, or a solution.. A focus on design and improvement of human-made systems—this text encompasses the domains of communications, defense, education, logistics, manufacturing, transportation, and others.. Process emphasis—The authors have organized content ...
