**Length of Paper** The length of a technical paper is not to exceed 5,000 (CCP Technical Paper word count is a minimum of 2,500 words) words [1]. This includes everything from the title to the final bibliography. If the subject requires more, then consider writing a second paper. The length of a technical paper is about right for a chapter in a book.

**Typical contents of technical paper** • The paper should capture non-experts and impress experts • Typically the paper contains the following • Title : what is the paper about ? • Summary : the condense version of the whole paper • Introduction : what is your objective ? • Numerical simulation/theory : what did you do with mathematics ?

**Guidance on each technical paper element** has been placed in the appropriate section as much as possible. A technical paper is a fact-based document used to close a project or a piece of work. Papers are written in an objective, formal, impersonal, third-person style. SAE International does not restrict the number of pages for a technical paper, although the recommended length is 9-12 pages in a 2-column format.

A standard structure for technical papers has evolved as follows: (1) Abstract (2) Introduction (3) Body of the Paper (technique, results, discussion) (4) Conclusions (5) References (6) Tables (7) Figures (and captions) Naturally there are minor variations in these sections depending on the topic and the journal's

• A solid, fact-filled technical white paper is between 6 and 12 pages, including the cover page. Shorter papers can be effective, but it is difficult to deliver education in only one or two pages.

Your paper must use a page size corresponding to A4 which is 210mm (8.27") wide and 297mm (11.69") long. The margins must be set as follows: • Top = 19mm (0.75") • Bottom =
