1/8/2009 · On Generalized Yang-Mills Theories and Extensions of the Standard Model in Clifford (Tensorial) Spaces Authors: Carlos Castro We construct the Clifford-space tensorial-gauge fields generalizations of Yang-Mills theories and the Standard Model that allows to predict the existence of new particles (bosons, fermions) and tensor-gauge fields of higher-spins in the 10 Tev regime.

Abstract. Starting from considerations of Bosons at the real life Compton scale we go on to a description of Fermions, specifically the Dirac equation in terms of an underlying noncommutative geometry described by the Dirac γ matrices and generalize this to branes in an underlying C-space (with Clifford Algebra).
